Kab Agouda
Flutter Software Engineer

Having close to 5 years of IT experience working with mobile application development. Looking for a growth-oriented career where my knowledge is used to impact organization goals & at the same time enrich my professional skills.

Making complex UI design simple and beautiful with Flutter!

Experience

Jan 2023 - Present
Munic | France - Remote
Flutter Software Engineer

I've created enjoyable user experiences with Flutter. Worked on solving complex UI problems and creating reusable components for efficient system design. GraphQL integration. All in agile methodology.
Munic is a leading vehicle data collection, processing and distribution company, providing devices and an artificial intelligence platform for vehicle data acquisition .

May 2022 -Jan 2023
Prodcrew | Mumbai , India · Remote
Flutter Software Engineer

Prodcrew Chat is an SDK based on Rocket Chat .
I've been working on a project called Cricadda which aims to enable cricketers to reach their full potential by providing them with the equipment they need to excel.
to excel.
I ran the mobile project with two part-time developers. I was responsible for architecture, state management, authentication, integration of third-party services such like firebase and google maps, the Razorpay payment system and also the distribution. I worked on application updates and remote notifications.
We used technologies such as
Flutter, Firebase , Remote Config, Google Maps, Gitlab, Postman, Codemagic CI/CD , TestFlight
